Who Am I?

Nicky van Vroenhoven

- MS BI Developer
- 10 years BI consultancy
- 2 years at Van Lanschot Kempen
- Blog on nickyvv.com
- @NickyvV

The screenshot shows a blog post from 'SQL, BI and stuff' dated Thursday, August 29, 2019. The title is 'The New Power BI Workspace Viewer Role Explained'. The post text mentions that in April, Microsoft announced the rollout of a new Viewer role in Power BI workspaces, referencing 'Power BI Planned features'. Below the text is a table titled 'Power BI Service' with columns for Feature, Release type, and Date. The 'Viewer role' is highlighted with a red box in the table. To the right of the table, there is a sidebar with an RSS feed link and a MuleSoft advertisement for 'Full Lifecycle API Management'.

The New Power BI Workspace Viewer Role Explained

Back in April of this year Microsoft announced the rollout of a new Viewer role in Power BI workspaces. It is mentioned in the release notes of April of this year: [Power BI Planned features](#)

| Feature | Release type | Date |
|---|----------------------|----------------|
| End user consumption | | |
| Power BI Home | General Availability | September 2019 |
| App navigation | Public Preview | May 2019 |
| Management, collaboration, and distribution | | |
| New workspace experiences: General availability and migration | General Availability | May 2019 |
| Shared and certified datasets | Public Preview | June 2019 |
| Viewer role | General Availability | July 2019 |
| Upgrade classic workspaces to the new workspace experience | General Availability | September 2019 |

On June 25 the Power BI team announced the rollout of the new Viewer role for Power BI workspaces.

Who Are You?

I am a...

- Business/End user
- BI dev/consultant
- IT (admin)
- DBA
- Manager
-?

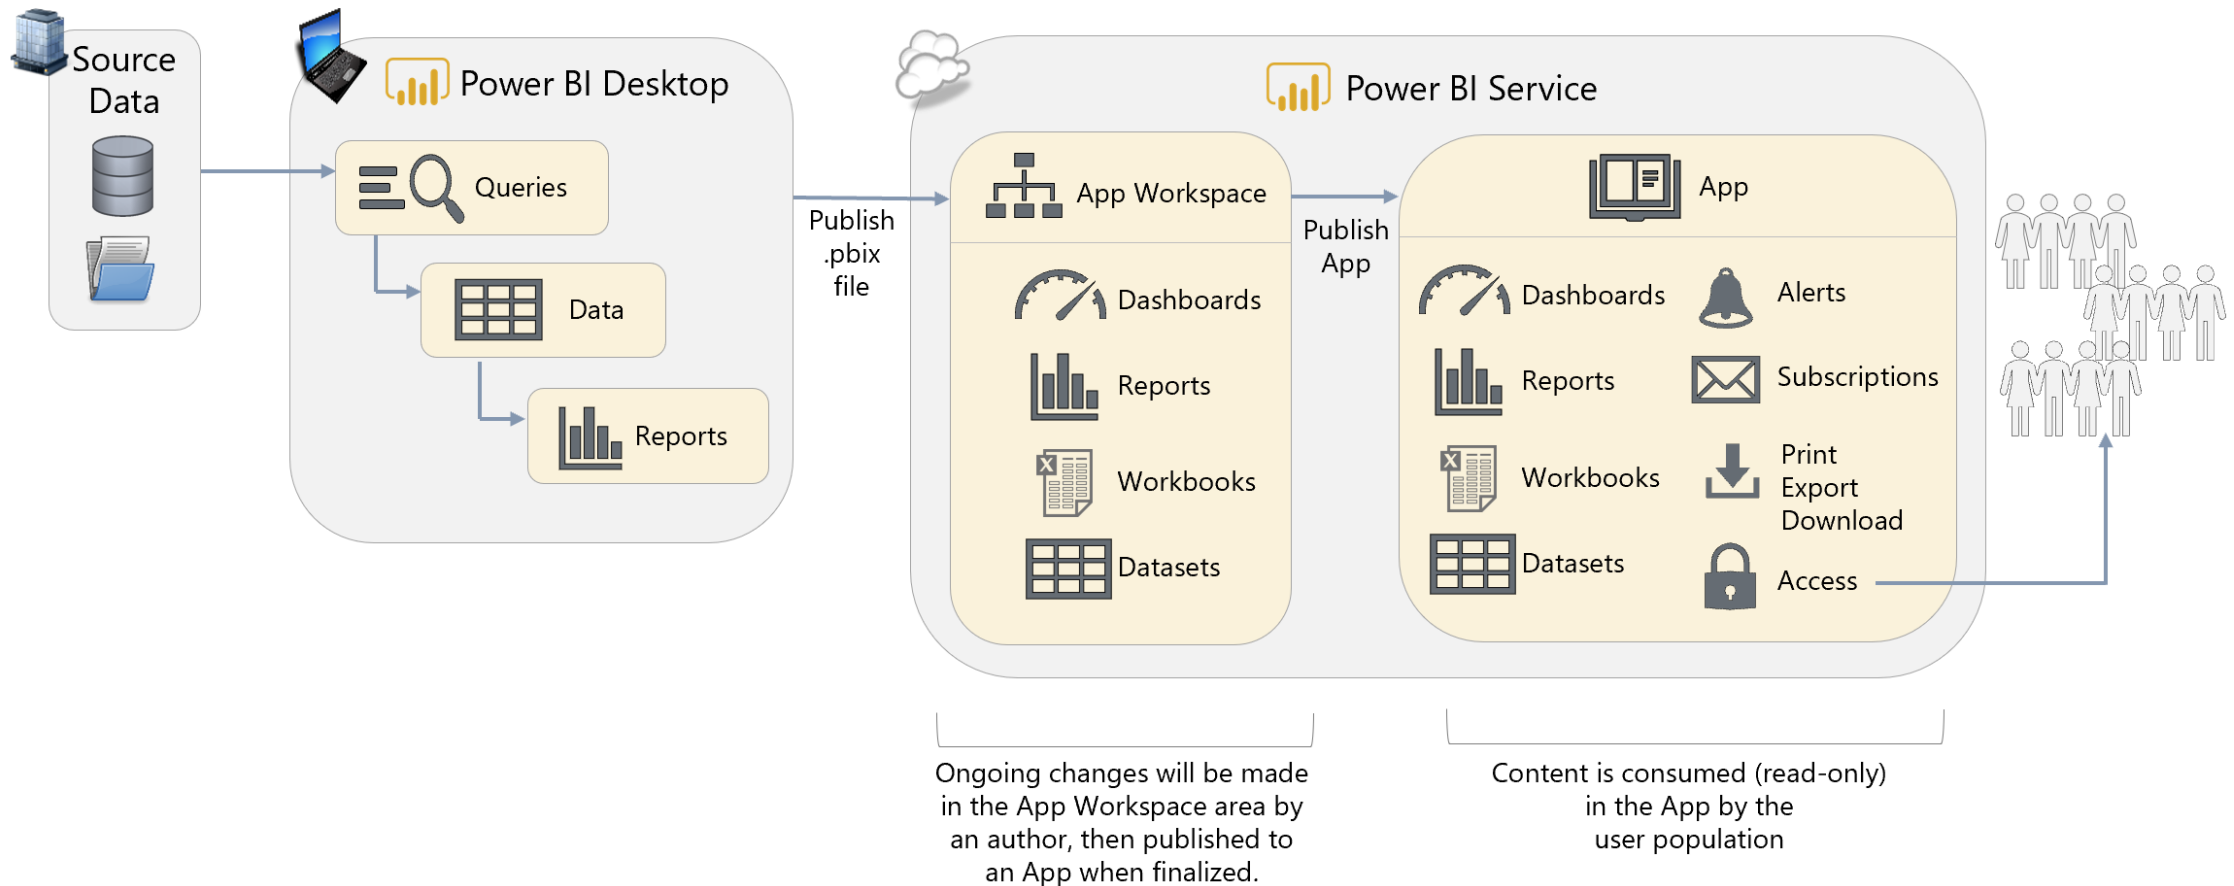

I work with...

- Power BI Desktop
- PowerBI.com
- App Workspaces
- Apps
- Power BI Premium

Agenda

- Create a workspace
- Publish a report
- Manage access to the workspace
- Create a dashboard
- Publish an App
- Certified & shared datasets
- Administrator management

Today's setup

Today's setup

- Download content from <http://bit.ly/pbidays-service>
- You can use your own Power BI pro account
 - Create a workspace; OR
 - Publish-rights to existing workspace
- Or use our demo Power BI tenant on pbidays.onmicrosoft.com

Today's setup

- User userXX@pbidays.onmicrosoft.com
- Password

XX = 01-20

user01@pbidays.onmicrosoft.com

userXX@pbidays.onmicrosoft.com

user20@pbidays.onmicrosoft.com

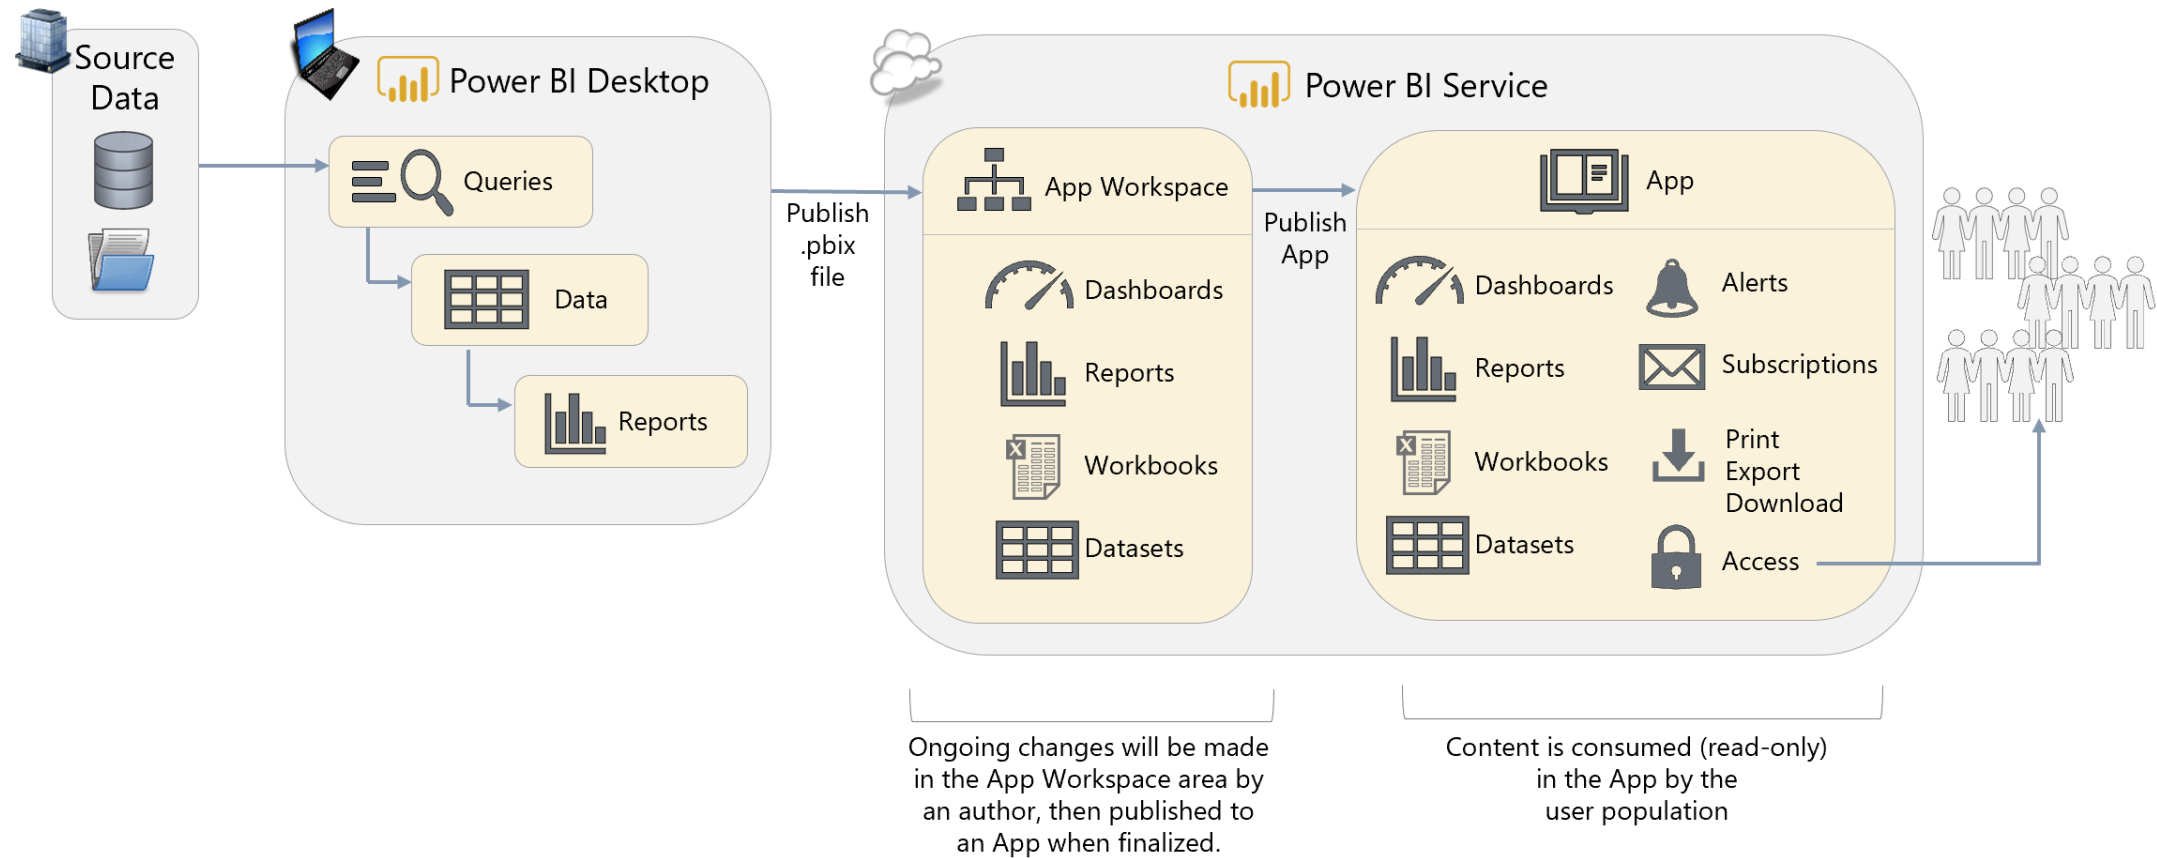

Download content from <http://bit.ly/pbidays-service>

Setup

- Download content from <http://bit.ly/pbidays-service>
- Log in to app.powerbi.com with your credentials
- If not installed yet: Download Power BI Desktop
- Start Power BI Desktop and login with the same credentials
- Give a shout out when you're ready!

User userXX@pbidays.onmicrosoft.com
Password

Workspace management

User
Password

userXX@pbidays.onmicrosoft.com

Workspace management

- Create workspace “UserXX”
- Open VanArsdel Performance.pbix
- Publish to the new workspace
- Give UserXX+1 member role access to workspace
- Look at your workspaces and the content

User userXX@pbidays.onmicrosoft.com
Password

Workspace management

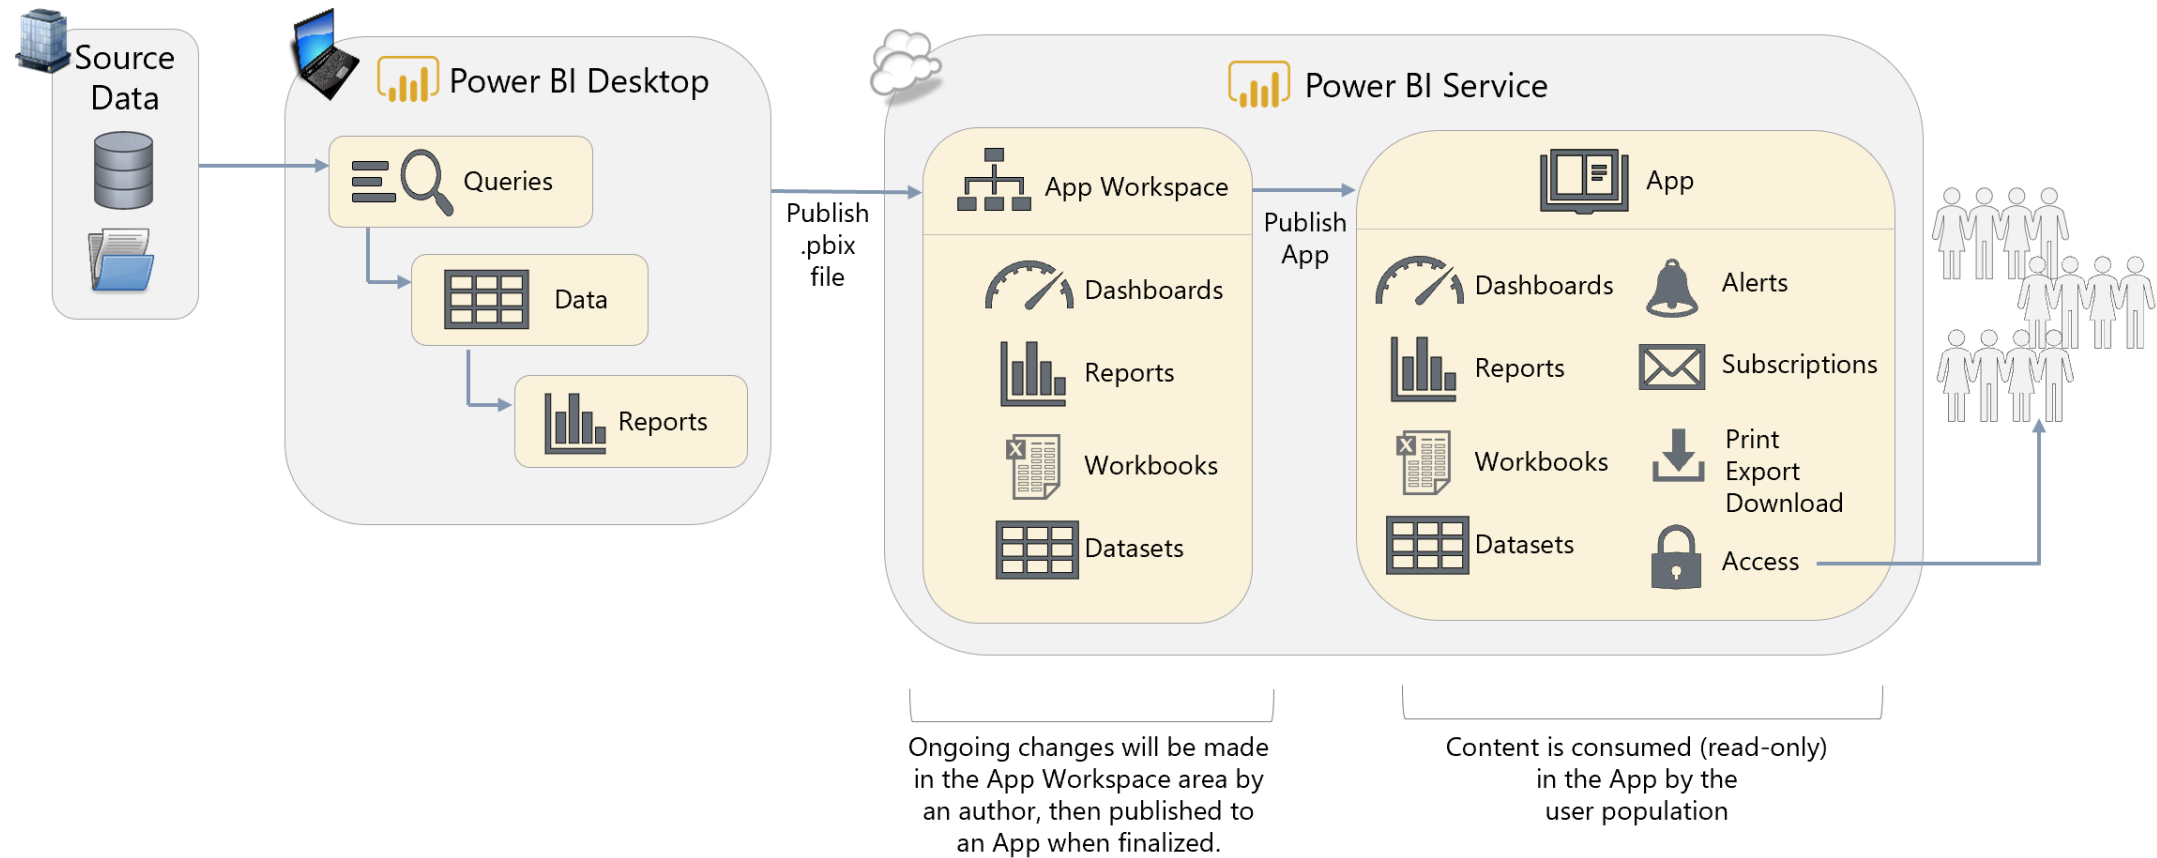

- Create a Dashboard (improvise 😊)
- Add an image tile:
<https://raw.githubusercontent.com/CharlesSterling/DiadManu/master/Vanarsdel.png>
- Create a few tiles from Q&A

User

userXX@pbidays.onmicrosoft.com

Password

Workspace management

Workspace management

- Publish App to UserXX+2
- View your App + App shared by UserXX-2

User userXX@pbidays.onmicrosoft.com
Password

Workspace management

- Create an alert on your dashboard
- Set the dashboard theme
- Create a phone view (dashboard or desktop)

Shared & Certified datasets

Power BI shared datasets

Single source of truth • Unified governance

Dataset catalog

Usage analytics

Certification

Lineage tracking

Everyone can explore and reuse

Use any tool you want

Create 360° dashboards from your data

Certified datasets

- Create a Promoted dataset
- Take a look at the dataset in PBI Desktop
- < Enable tenant setting Certified datasets>
- Create a Certified dataset

Shared datasets

- Tenant setting: Use datasets across workspaces
- Create new report on published Power BI dataset
- Create some visuals
- Publish to other workspace
- Check Manage permissions

Admin management (demo only)

- Important Tenant settings:
 - Help and support settings
 - Receive email notifications for service outages or incidents
 - Publish to web
 - Certification
 - Push apps to end users
 - Custom visuals
- Custom Branding
